## EXPERIENCE

### I2 TECHNOLOGY | FULL STACK SOFTWARE ENGINEER

September 2023 – May 2024 | Remote, India

- At I2 Technology, a consulting startup, contributed to building responsive UIs and researching solutions for business automation.
- Led development of a full-stack customer engagement platform using Next.js 13, TypeScript, Tailwind CSS, and Node.js, implementing server-side rendering (SSR), API routes, and dynamic routing.
- Engineered a component-driven UI with Radix UI, integrated authentication using OAuth 2.0, and optimized state management with React hooks and context API.

### SKILZEN HIRING-BIRD | FRONTEND SOFTWARE ENGINEER

May 2022 – July 2022 | Remote, Hyderabad

- Transformed intricate Figma designs into responsive, reusable UI components using Next.js and Tailwind CSS, ensuring design consistency and seamless performance across devices.
- Engineered a file storage system with MySQL, implementing role-based access control, secure file upload handling, optimized database via MySQL Workbench, and ensured high-performance data retrieval.
- Containerized the entire application using Docker, improving server-side performance during deployment.

## PROJECTS

### MATH NOTE ↗ | REACT.JS, TYPESCRIPT, PYTHON, FASTAPI, TAILWIND CSS, , GOOGLE GEMINI

[GitHub Repository](#)

- Developed a dynamic AI equation assistant with React/Next.js, enabling complex expression evaluation, variable handling, and graph Analysis. Integrated Google Gemini for real-time analysis and intelligent computation.
- Engineered real-time computation and graphical insights with FastAPI, leveraging lifespan events and context managers for clean startup logic. Ensured modular architecture for scalable backend operations.

### BOOKMYROOM ↗ | NEXT.JS, NODE.JS, PRISMA ORM, MONGODB, MUI

[GitHub Repository](#)

- Full-stack hotel booking platform, supporting real-time listings, secure authentication, and SSR. Optimized PostgreSQL queries for scalable performance and travel management.
- Implemented robust auth flows, session handling, and APIs with. Ensured clean data integrity for reliable user experience across booking, and account management.

### MY-SUMMARIZER.AI ↗ | REACT.JS, RAPID API, OPENAI GPT-4.0

[GitHub Repository](#)

- Built a cross-platform AI content summarizer using React/Next.js and Node.js, integrating GPT-4 via Rapid API to generate concise summaries for articles, emails, and PDFs with secure data handling.
- Designed a responsive UI for seamless content uploads and analysis, ensuring scalability, maintainability, and smooth user experience across sessions.

## SKILLS

### PROGRAMMING SKILL

React.js • Next.js • TypeScript  
• JavaScript ES14  
Node.js • Express.js • Python3  
• FastAPI • Flask  
PostgreSQL • MySQL • Java •  
HTML/CSS

### TOOLS/PLATFORMS

Git • Postman • AWS • Vercel  
WordPress • Docker • GitLab •  
Supabase • Figma • GCP

## EDUCATION

### INDERPRASTHA ENGINEERING COLLEGE

BACHELOR'S IN COMPUTER SCIENCE  
AND ENGINEERING

July 2024 | Ghaziabad, Delhi NCR

B.Tech

Cum. GPA: 8.0 / 10

### ARUNACHAL UNIVERSITY OF STUDIES

DIPLOMA HIGH SCHOOL IN  
COMPUTER SCIENCE

August 2021 | Arunachal

School of Computing

Cum. GPA: 7.2 / 10

## COURSES WORK

Data Structures • AI Artificial  
Intelligence • Machine Learning  
Computer Networks • OOPS  
Blockchain • Database  
Management

## ESSENTIAL SKILLS

Teamwork  
Problem-solving  
Adaptability • Communication •  
Accountability • collaboration •  
proficiency
