## EXPERIENCE

### I2 TECHNOLOGY | FULL STACK SOFTWARE ENGINEER

September 2023 – May 2024 | Remote, India

- Led development of a full blogging platform using Next.js, TypeScript, and Tailwind, with component-driven architecture using Radix UI and Shadcn UI.
- Coordinated an 8-member team to deliver I2's official website, improving delivery speed by 75% through structured Git flow and code reviews.
- Optimized performance and code maintainability through reusable design patterns and clean backend logic with Node.js.

### SKILZEN HIRING-BIRD | FRONTEND SOFTWARE ENGINEER

May 2022 – July 2022 | Remote, Hyderabad

- Converted complex Figma UI designs into responsive, modular Next.js components using TypeScript and Tailwind CSS, enhancing UI consistency and cross-device compatibility.
- Designed and implemented a file storage system architecture using MySQL Workbench, enabling private and public access logic, and integrated secure file upload and access handling.
- Containerized the entire application using Docker, reducing environment setup time and improving server-side performance during deployment.

## PROJECTS

### MATH NOTE ↗ | PYTHON, FASTAPI, REACT.JS TAILWIND CSS, TYPESCRIPT, GOOGLE GEMINI

[GitHub Repository](#)

- Built a smart, interactive equation assistant that evaluates complex expressions, manages variables, and renders graphs. Integrated Google Gemini API for dynamic calculations and analysis.
- It can perform advanced computations, graphical analysis, and real-time data processing. Additionally, I used fastAPI lifespan events context managers to define logic that should be executed before the application starts up.

### BOOKMYROOM ↗ | NEXT.JS, REACT, PRISMA, MONGODB, NODE.JS

[GitHub Repository](#)

- Developed a full-stack hotel booking platform enabling users to browse, book, and manage stays with real-time listings and authentication. Implemented server-side rendering, secure user sessions, and optimized DB queries using Prisma.
- User authentication and data management, ensuring scalability and reliability. This allows users to browse, book, and manage their travel effortlessly.

### MY-SUMMARIZER.AI ↗ | REACT.JS, RAPID API, OPENAI GPT-4

[GitHub Repository](#)

- Created an AI-powered content summarizer for articles, emails, and PDFs with a responsive UI. Integrated GPT-4 via Rapid API to generate concise, human-like summaries.
- User-friendly interface, allowing seamless interaction for users to upload and analyze content cross-device accessibility.

## SKILLS

### PROGRAMMING SKILL

JavaScript ES14 • Python3  
Java • MySQL • HTML/CSS •  
TypeScript • React • Next.js  
Express.js • Node.js • Flask •  
FastAPI • PostgreSQL

### TOOLS/PLATFORMS

Git • Postman • AWS • Vercel  
WordPress • Docker • GitLab •  
Supabase • Figma • GCP

## EDUCATION

### INDERPRASTHA ENGINEERING COLLEGE

BACHELOR'S IN COMPUTER SCIENCE  
AND ENGINEERING

July 2024 | Ghaziabad, Delhi NCR

B.Tech

Cum. GPA: 8.0 / 10

### ARUNACHAL UNIVERSITY OF STUDIES

DIPLOMA HIGH SCHOOL IN  
COMPUTER SCIENCE

August 2021 | Arunachal

School of Computing

Cum. GPA: 7.2 / 10

## COURSES WORK

Data Structures • AI Artificial  
Intelligence • Machine Learning  
Computer Networks • OOPS  
Blockchain • Database  
Management

## ESSENTIAL SKILLS

Teamwork  
Problem-solving  
Adaptability • Communication •  
Accountability • collaboration •  
proficiency
