## Work Experience

I 2

*Head of Web Department Intern*

**Present**

*Dubai, UAE, Remote*

- Leading an 8-person team to develop the I2 business site landing page, optimising user experience with modern design tools like Tailwind, Radix UI, and Shaden UI.
- Add a blogging system, And also Managed to pull requests from contributors using TypeScript, Next.js, and Node.js.
- This innovation led to a remarkable 75% acceleration of development cycles and significantly improved code maintainability. Demonstrate expertise in JavaScript and React.js, and Node.js.

## SKILZEN

**April 2022 – July 2022**

*Junior Front-end Developer*

*Hyderabad, Remote*

- Collaborated within the front-end team to develop a web platform by translating a Figma design into a set of Next.js and TypeScript functional components. Next.js creates highly responsive and modular front-end components.
- Designed and implemented the backend architecture for a file storage system with concurrent public and private accessibility, leveraging MySQL Workbench and integrating file upload functionality.
- Designed and implemented the back-end architecture for a file storage system, ensuring efficient server-side performance. Employed Docker for containerization and streamlined deployment processes.

## Education

**Dr. A.P.J. Abdul Kalam Technical University**

**August 2020 – June 2024**

*BTech. Information Technology, SCGPA 7.5*

*Uttar Pradesh, India*

**Courses:** Operating Systems, Data Structures, Analysis of Algorithms, Artificial Intelligence (AI), Machine learning ML, Design Optimization, Web Socket, Web Technology, Computer Network, Database Management, Blockchain, Web RTC, Project Management.

## Technical Skills

**Languages:** Python, JavaScript, Java, HTML/CSS, Postgre SQL, React, Next.js 13, Typescript, PHP, Drupal

**Development Tool:** CircleCI, Gradle, Git, Kubernetes, Jenkins, Laravel, clerk, strip, PlanetScale

**Software/Platforms:** VS Code, Eclipse, GitLab, Android Studio, MongoDB, Prisma, AWS, Glitch, Docker

**Skill Set:** Data Structure, Requirements Gathering, Server-Side Languages, API Design, Problem Solving, Cloud Services

## Projects

**AI Reads -Fullstack SaaS Platform** [↗](#) | [Next.js 13](#), [React](#), [TypeScript](#), [Prisma](#), [tRPC](#), [Tailwind](#), [Radix](#)

- \* Full-stack SaaS platform, AI Reads empowers users to analyze, summarize, and generate questions from documents of any size via an AI-powered chatbot interface.
- \* Use tech stack including Next.js 13, React, TypeScript, Prisma, tRPC, Tailwind, Radix UI, and Kinde Auth.
- \* Enabled users to conveniently manage their document records with robust database integration. Utilize a combination of front-end and back-end technologies to create a seamless user experience
- \* [GitHub Repository](#)

**DocuMation -Fullstack documents manager** [↗](#) | [Next.js 13](#), [React](#), [Convex](#), [Tailwind](#), [MySQL](#), [Clerk](#)

- \* DocuMation, a Next.js 13 and React-based full-stack project integrated with Convex database and authentication, Tailwind, Radix, and Shaden UI for content creators, providing seamless project management
- \* "Enabled rich media embedding capabilities, allowing users to seamlessly integrate images, videos, and files into their notes and pages for enhanced project documentation.
- \* [GitHub Repository](#)

**AI Express -SaaS Platform** [↗](#) | [Next.js 13](#), [React](#), [Tailwind](#), [Prisma](#), [Stripe](#), [TypeScript](#), [Postgresql](#)

- \* AIEExpress- full-stack AI web application that hosts five distinct AI tools, from image and video generation to conversation models and code generation, catering to diverse creative needs.
- \* Enhanced User Engagement- Employing React, Next.js, Nest.js RESTful APIs, and Material UI, AIEExpress's UI/UX prototypes have led to a remarkable 25% increase in user engagement, and a 20% reduction in bounce rate. Beyond the free tier, users can opt for a monthly subscription also.
